-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. The rejection of claim 3 under 35 USC § 112, second paragraph set forth in the previous Office Action (mailed on 04 August 2005) has been overcome and is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1732

4. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Kim et al (U.S. Patent 6,355,198 B1) or Lee et al (U.S. Patent Application Publication 2003/0062334 A1).

Kim et al (see the entire document, in particular, col. 5, lines 26-33; col. 10, line 62 to col. 11, line 15; col. 20, lines 34-67; col. 21, line 46 to col. 22, line 9; col. 22, line 46 to col. 23, line 5; col. 24, line 50 to col. 25, line 3) and Lee et al (see the entire document, in particular, paragraphs [0011], [0012], [0040] and [0041]) teach a process of patterning a substrate with a template having a mold including the aspects of capillary action and wetting as claimed, except that Kim et al and Lee et al do not explicitly teach controlling movement between the substrate and the mold or controlling distance between the mold and the substrate. However, these aspects would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of either Kim et al or Lee et al principally in order prevent damage to the substrate and/or the mold and to provide the desired patterning to the substrate.

Response to Arguments

5. Applicant's arguments filed on 02 November 2005 have been fully considered but they are not persuasive.

Art Unit: 1732

Applicant argues (pages 15-19) that Kim et al and Lee et al do not teach controlling movement between the substrate and the mold or controlling distance between the mold and the substrate and that these aspects are not obvious within the meaning of 35 USC § 103. Examiner responds that these aspects would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of either Kim et al or Lee et al principally in order prevent damage to the substrate and/or the mold and to provide the desired patterning to the substrate.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

Art Unit: 1732

from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
